

Service

Service is the AUMUND promise to actively maintain the performance of equipment and to guarantee long-term the readying of assembly services, spare parts, preventive maintenance (PREMAS®) and conversion concepts.

AUMUND Group Service is at the disposal of customers and can be called upon at all locations worldwide. Well-equipped spare parts storage in Germany (Rheinberg), in the USA (Atlanta), in Brazil (Ipatinga/MG), and in Hong Kong ensure a rapid supply of necessary consumables and spare parts.

With PREMAS® preventive maintenance, maintenance effort can be efficiently controlled and the lifespan of the equipment can be increased.

Where capacities are increased or processes changed, conversions and refurbishments can in many cases be a reasonable alternative to a newbuild. The specialist team for conversions develops suitable concepts and implements them reliably.
